Hebrews 11:6-7 (NIRV)

Without faith it is impossible to please God. Those who come to God must believe that he exists. And they must believe that he rewards those who look to him.

Noah had faith. So he built an ark to save his family. He built it because of his great respect for God. God had warned him about things that could not yet be seen. Because of his faith Noah showed the world that it was guilty. Because of his faith he was considered right with God.

Circle 10 things that are different in the bottom picture.

understand it

Noah's Ark

The ark God told Noah to build was 300 cubits long, 50 cubits wide, and 30 cubits high.

Was there really room for all those animals?

A cubit is the distance from a man's elbow to the tip of his longest finger. (Today's "standard cubit" is 18 inches.) So how big was the ark in feet?*

Consider this: Noah's ark was about the size of one and one-half football fields or two Boeing 747s. It held about as much as 569 railroad stock cars.

That's BIG!

The ark was waterproofed by filling in every crack with pitch (a tar-like substance) both inside and out.

You bet it floated!

The ark held Noah, his family, and every kind of animal that couldn't survive in the water.

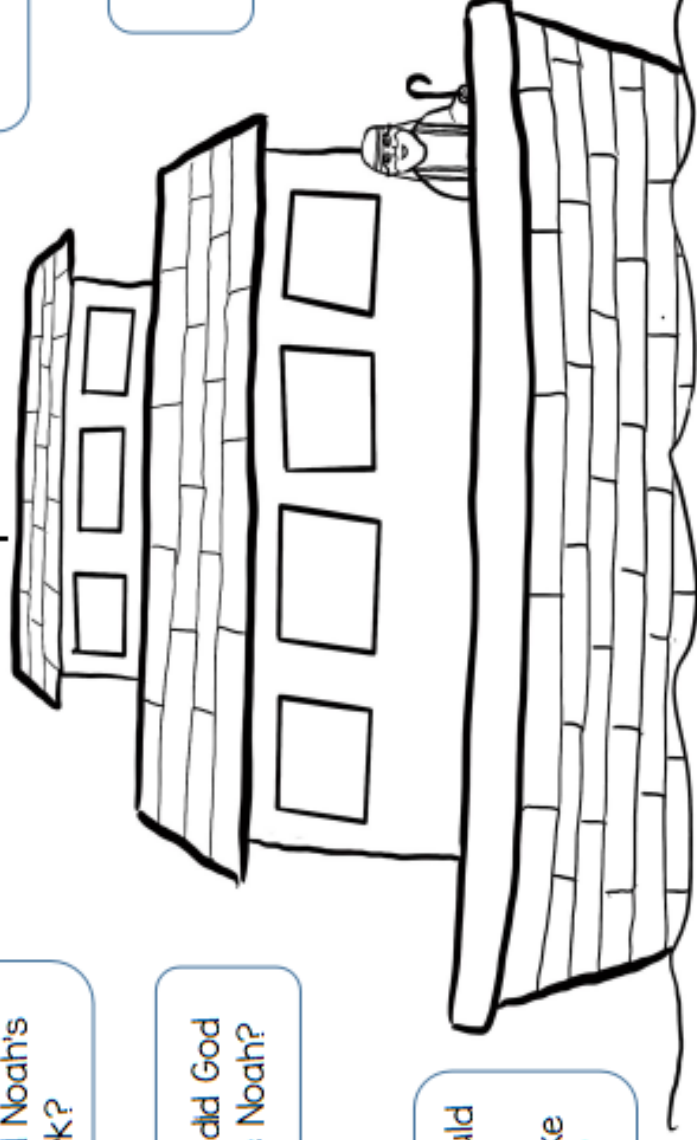

draw it and answer it

Can you describe what it would have been like aboard Noah's Ark?

Why did God save Noah?

How could we be more like Noah?

Can you draw in the animals on Noah's Ark?

Why was Noah on board the ark?

What is an ark?

Which animal would be the loudest?

What animals did you draw?
